COME VISIT and enter THE HEART OF THE DIAMOND, our gracious Customer/Demo atrium one easy minute off of Route 128 in Gloucester. This is where we developed and manufacture everything, the base from which expert and articulate live humans will support you directly 24/7 throughout our relationship. Here, on a comfortable chair with rollers in the Heart of the Diamond, you can use our several superior liquid-handling systems. Start by taking one of our stunning Differential Pipettors in your hand and start pipetting to immediately experience -- in the most direct sensory as well as intellectual way -- its unique power and beauty. Then swivel your chair to other systems of interest, running them hands-on to experience further the liquid-handling principles of Differential Displacement™ and Dual Resolution™ that we have pioneered over the last two decades. You will experience refreshing power and reliability. You can do precision and accuracy runs here if you wish, gravimetrically on our scales or photometrically with our dual-beam Artel Personal Calibration System, and take the data with you. Maybe you will buy. You will certainly learn and enjoy! And we will enjoy meeting you.
